

# WHAT THE CONSULTATION DOESN'T TELL YOU

**There is a lot of information displayed in this exhibition but it omits key things**

## **It doesn't tell you:**

- **Where new flight paths will go**
- **That people in West London who currently get a half day's break from the noise could find that cut to a third**
- **That there will be a quarter of a million more planes a year using Heathrow**
- **That new roads and railways needed for the 3<sup>rd</sup> runway could cost the taxpayer £5 - £15 billion**
- **Anything about how much the health costs will be because of noise and pollution**
- **That air pollution levels near Heathrow are already above the legal limits or anything about how they will be brought down**
- **That, if a third runway was built, Heathrow would cause more climate change emissions than anywhere else in the country**
