

International Noise Awareness Day: 29th April

Six key things the next Government could do to improve the noise climate:

- 1. Aircraft Noise:** Ensure fair flight paths for all
- 2. Road Traffic Noise:** Cut speed limits
- 3. Rail Noise:** Retrofit all trains with quieter brakes - would cut noise by up to 50%
- 4. Wind Farm Noise:** Update official noise guidelines in order to better assess the impact on communities
- 5. Neighbour Noise:** Fine local authorities who persistently fail to tackle neighbour noise problems
- 6. Piped Music:** Ban piped music from public places, such as hospitals, where people have no choice but listen to it
